

The Timberlea

Size: 1088sq. ft.

Bedrooms: 2

Bathrooms: 2

Master Bed Location: Main Floor

Home Type: Bi-level

Features:

Our recently redesigned two bedroom bi-level with 1088 sqft could become the "mighty mite"!

We have added 64 sqft, to our previous design to provide you with an en-suite boasting a large shower.

For additional comfort, we have also expanded the walk-in closet to feature built-in shelving for organized functionality.

Banjo counter tops in both baths make this a highly functional 2 bedroom home.

Needing more than just two bedrooms?

Another terrific feature with this plan is that the basement comes completely finished with 2 more bedrooms (or is it a den for the home office), an additional bathroom, and a fully developed family room of nearly 15 x 20 feet.

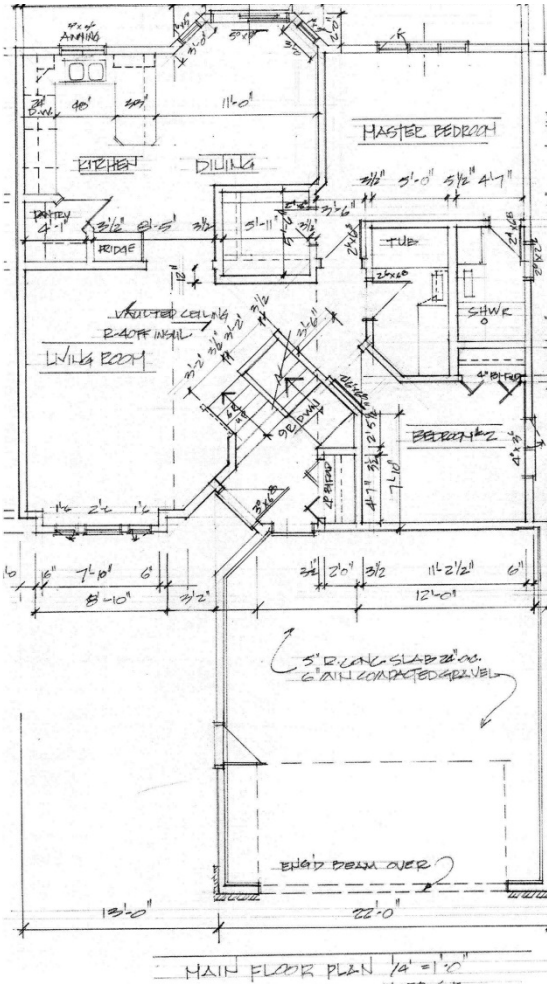

An optional gas fireplace is also available for cozy nights
